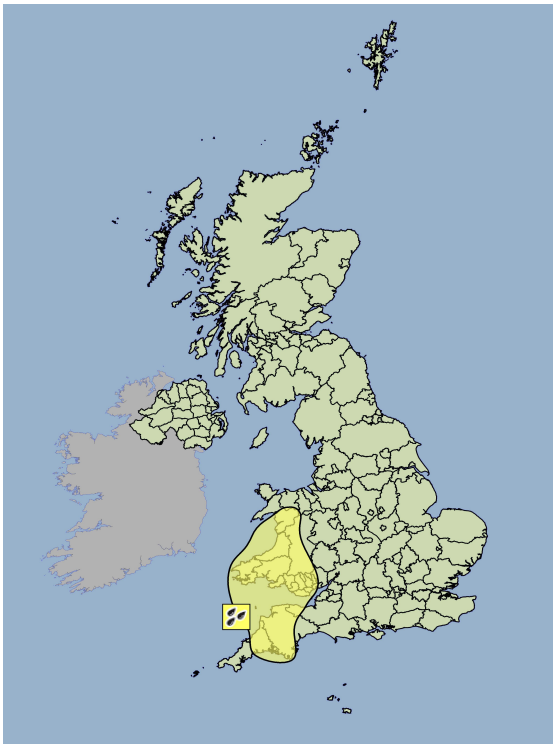
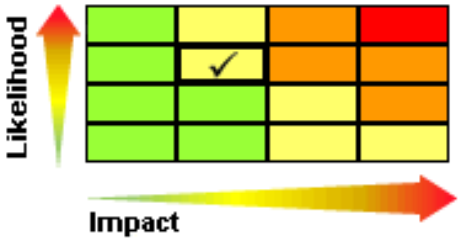
National Severe Weather Warning Service





Chief Forecasters Assessment
A cold front is expected to become slow moving across the region during Friday evening and night, before clearing southeastwards during Saturday morning. Around 10-20 mm of rain is expected to fall quite widely, with 40 mm possible over high ground. There remains some uncertainty over how long the frontal zone will become slow moving across the region and therefore the expected amounts of rain.

Further updates to this warning are likely.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **18:00 on Fri, 29th Jan 2016** until **06:00 on Sat, 30th Jan 2016**

Further spells of heavy rain are expected to develop across Southwest England and Wales during Friday evening, persisting overnight, before clearing away to the south during Saturday morning. The heaviest and most prolonged spells of rain are likely to be over high ground.

Be aware of the potential for further localised flooding and disruption to travel.
